OBJECTIVE

Software engineer focused on developing and maintaining scalable and reliable front-end systems.

EDUCATION

Senior Computer Engineering Student, Cumhuriyet University

Expected 2025

SKILLS

Technical Skills

TypeScript, React.js, Redux, Node.js, Next.js, CSS, Accessible HTML

Soft Skills

Problem Solving, Adaptability, Communication, Teamwork, Leadership

EXPERIENCE

Jotform

Jun 2024 - Aug 2024

Intern

Ankara, Turkey

- Created a comprehensive feedback collection system using React.js, Redux and Jotform CSS for Jotform with my teammates.
- This system will allow users to easily provide feedback, which will be collected, analyzed, and displayed in a meaningful way.
- Feedback will help the team understand user needs, identify areas for improvement, and make data-driven decisions to enhance the overall user experience.

Topfiyt

Feb 2024 - Mar 2024

Front-end Developer

Sivas, Turkey

- Contributed to the startup project as a front-end developer by making performance improvements and code enhancements.

PROJECTS

Feedback Collection System. Created a feedback collection system for Jotform using Jotform CSS, React.js, and Redux, which consists of two parts: the feedback collection area and the area where feedback is visualized. This way, users' requests, and needs can be identified more clearly.

Personal Portfolio. Created my portfolio using Next.js that looks like a Macbook screen using Next.js React.js and CSS. [Go to my portfolio.](#)

Rick and Morty. Rick and Morty trailer page, built using React.js. [Go to Rick and Morty.](#)

Portfolio v2 Created my portfolio about my resume, using React.js [Go to my resume.](#)
